***Election/Restriction***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims (1-15, 65) and (16-26, 67) and (31-33, 70, 77) and (34, 52-53, 56-63, 72-73) and (51, 78), drawn to **a motor control unit selectable from a plurality of different types of motor control units**, classified in class 361, subclass 614, 731
- II. Claims (83-88), drawn to a motor/machine mountable base designed to accommodate **one type of modular control unit** laterally next to it; with control features comprising a soft start controller, a variable frequency drive etc., classified in class 361, subclass 23.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombination I has separate utility such as a motor/machine mountable base capable of interchangeably receiving a plurality of motor controllers with different features. Subcombination II has separate utility such as a motor/machine mountable base with a lateral mounting receptacle capable of receiving one type of modular control unit. See MPEP § 806.05(d).

The examiner has required restriction between subcombinations usable together. Where applicant elects a subcombination and claims thereto are subsequently found allowable, any claim(s) depending from or otherwise requiring all the limitations of the allowable subcombination will be examined for patentability in accordance with 37 CFR 1.104. See MPEP § 821.04(a). Applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.
